## GLAMOR 650-2200 VA

Plug&play UPS for the protection of home and small business devices

## GLAMOR S 600-2000 VA

Pure sine wave UPS for the non-stop supply of high end devices or with PFC power supply.  
UPS equipped with phone and data lines protection

### Applications

- PCs
- Wi-Fi routers
- Video game consoles
- TVs
- Satellite receivers
- POS
- Cash registers
- Surveillance cameras
- Home monitoring devices

### Applications

- Workstations
- Gaming PCs
- Small servers
- Networking equipment
- Hi-Fi and home theatre TV
- Video game consoles
- Satellite receivers
- Video surveillance
- Pellet stoves

### Uptime table

Consulting the summary table below will let you quickly identify a model based on the total VA/W consumption of the devices to be protected.

Model	GLAMOR - Line-interactive					GLAMOR S - Line-interactive				
	650 VA	1000 VA	1200 VA	1600 VA	2200 VA	600 VA	800 VA	1000 VA	1500 VA	2000 VA

Indicative input power of various devices (you are advised to check actual input power)

- WI-Fi router 20/30 W • POS + Cash register 40/50 W • NAS 30/60 W • 43" TV 100 W • Inkjet printer / Scanner 180 W • Desktop PC + 21" LCD monitor 250 W • Desktop Gaming PC + 24" LCD monitor 500 W • High-end dual-processor PC + 32" LCD monitor 800 W • Rack/tower server from 300 to 1000 W • Video game console 140 W

## GLAMOR - GLAMOR S

- Line-interactive UPS to protect devices in the home, micro business and SMEs.
- Connected devices are always available because they can be powered up when there is no mains power.
- Automatic restart after prolonged blackouts means that it is always ready to protect your loads.
- The built-in automatic voltage regulator (AVR) stabilises the power when there are mains faults (e.g. spikes, sags, over- and under-voltages etc.), providing high levels of power protection and quality.
- Supplied with PowerMaster, intuitive software that can be downloaded for free. All you need in a box: supplied with input, output power cables and USB cable to protect hardware and data.
- The backlit LCD display makes it easy to read the UPS status, so all parameters can be kept under control.
- Easy battery replacement.
- The plug-in feature ensures that the battery is always charged: the UPS charges the battery even when it is switched off.
- The built-in USB communication port makes it easy to connect to the PC.
- All needed cables included: input, output power and USB cables.

### Low cost of ownership due to longer expected battery life

- Wide input allowable tolerance in both voltage and frequency (160-290V - 45-65 Hz): prevents batteries from going into operation when there is a major variation in input power.
- ABDM (Automatic Battery Discharge Management) protects batteries from deep discharge by increasing the cut-off voltage (battery cut voltage), the voltage at which a battery is considered fully discharged.
- Charge control: prevents overcharging of batteries that leads to their degradation by modulating the voltage to the battery to maintain a full charge during its operation.
- Automatic testing every 24 hours allows early detection of problems protecting batteries from failure.

### PowerMaster: UPS monitoring and management software

Main features of the monitoring and control software (available free of charge at [www.ablerex.eu/download](http://www.ablerex.eu/download)):

- quick and easy installation and configuration via USB;
- orderly, automatic closure of the applications and operating system, even if the user is not there;
- UPS monitoring and power supply event reporting;
- transmission of alarms for the most common power supply problems and notification of system shutdown via email and text message;
- automatic testing of UPS and battery;
- available for Windows, MAC, Linux, etc. (full list available at [www.ablerex.eu/download](http://www.ablerex.eu/download)).
