TABLE OF CONTENTS

Ablerex	
About us	4
A complete range for every need	10
Single-phase line-interactive UPS	
For PCs, Wi-Fi routers, home and networking devices - Ideal for home, small businesses and SMEs	12
GR 650-2200 VA • GR S 600-2000 VA	13
Single-phase online UPS	
For workstations and telecommunications, networking and video surveillance equipment, server rooms - Ideal for SMEs and large businesses	18
AR PLUS Tower • AR PLUS RT 1000-3000 VA	20
OD • OD H RT 1000-3000 VA	24
MSIII Tower • MSIII RT 1/1 6000-10000 VA	26
MSII Tower • MSIII RT 3/1 10000-20000 VA	30
Three-phase UPS	
For server room, data centres, industrial automation, electromedical equipment - Ideal for SMEs and large businesses	34
GLM	36
KR PLUS 10-40 kVA • KR PLUS XL 10-40 kVA	37
TS 10-80 kVA	41
TT 100-500 kVA • TT GT 100-800 kVA	44
MD 15-900 kVA	52

Single- and three-phase CPSS	
For EN 50171 applications: fire protection, smoke detection, emergency lighting, security and alarm systems	56
CPSS single-phase 4000-10000 VA	58
CPSS three-phase 10-40 kVA	58
Power quality device	
For the medical, telecommunications, industrial, energy distribution, transport, finance, tertiary and broadcasting sectors	64
ESP Wall mount active filters • ESP Modular active filters	66
STS Central static transfer systems for maximum availability in critical applications	70
ATS Automatic transfer systems	72
BMS Wireless battery analysis, monitoring and protection system	74

ABOUT US

Pleased to meet you

We are an ISO 9001 and 14001 certified multinational that designs and manufactures UPS and PQD (Uninterruptible Power Supply and Power Quality Device) for applications of all types and sizes.

In business since 1994 and with over 100 patents, we guarantee power continuity and quality to companies, IT or electromedical facilities, telecommunications, services in everyday locations and for everyday activities, and technology at home or in the workplace.

Providing answers

Our 150 engineers and a team of 1000 sales, marketing, logistics and production operators deliver projects, products and multilingual technical assistance worldwide.

Product assistance, transport and delivery optimisation, personalised documents, technical support: our watchwords are continuity, quality, reliability and transparency.

Count on us

Over thirty years of international relations and experience have taught us the importance of establishing transparent and direct relations, and of guaranteeing excellent products to meet the specific needs of every business, from large to small companies, from the office to home.

We are a flexible and reliable partner, to guarantee energy and continuity in any situation.

Picking up on the signs

Providing high-quality solutions to major international UPS manufacturers for three decades has given us authority and credibility. We have therefore decided to identify ourselves with a brand to respond to the needs of an increasingly demanding user base, attentive to the most sophisticated technologies that require continuity.

The Ablerex product line was created on the basis of our experience.

Sharing the future

We track the market trends, technological innovations, and the impact of the Internet of Things on goods and production.

Investing constantly in research and development, innovation, smart facilities for conscious production, synergies with other manufacturers, new *training tools, services* and more is a sign of our commitment to tackling the challenges of Economy 4.0 and looking to the future to build it day after day with clients who select us to work alongside them.

The best follow-up there is

We serve large companies, as well as small companies aiming to grow by investing in steps. We choose a streamlined, tailor-made approach to simplify as much as possible and provide more efficient assistance.

We select a limited number of partners to build a development and action plan together in order to fully satisfy end customers.

Guaranteeing flexibility, promptness, speed, efficiency.

ABOUT US

Founded in 1994, Ablerex is a multinational company specialising in manufacturing power protection solutions. The company is ISO 9001 and 14001 certified, and esigns and manufactures a wide range of UPS (uninterruptible power supply) and power quality devices to ensure power reliability, quality and continuity.

It is a reliable partner that hasbeen in business for 25 years, chosen as an OEM by the most popular UPS brands. With 150 engineers in R&D and over 1000 employees, the company is committed to innovative solutions. Customisation from design to specific applications and attention to quality are in the company's DNA.

Its worldwide production and operation sites, its staff of over 150 engineers and 1000 employees, and its multilingual technical support means that Ablerex can guarantee the best solutions to meet all market needs. The company is focussed on research and development, and has more than 100 advanced patents as well as the most important safety certifications such as CE, LVD, EMC and RoHS.

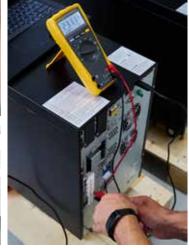

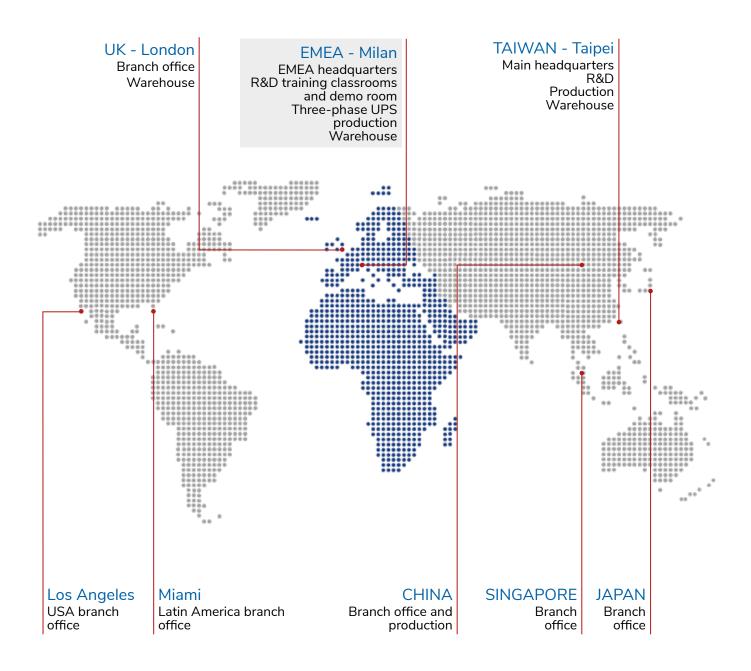

ABOUT US

In the right places

We have international production sites, EMEA headquarters in Milan, Italy - in an ideal time zone for communications, in a great location close to the international hub at Malpensa, - a warehouse near the port of Venice to optimise logistics and distribution times for faster deliveries throughout the country.

Ten reasons to choose us

From small to extra-large

specific solutions for applications of all types and sizes and for large and small companies.

Prioritising excellence

constant investments in research, development and technologies to optimise production and create new product lines.

More than one flagship

over 100 patents and safety certifications, and a full range of quality products.

For all budgets, but not for everyone

advantageous prices, many previews and discounts on special orders, to access exclusive quality.

Seniority in the field

three decades of business in the sector guarantee experience, reliability, support and efficient services.

We get straight to the point

EMEA headquarters and warehouses in strategic areas to be in the right time zone for communications ensure faster and more efficient shipments and deliveries.

Not only UPS for standard applications

we develop unique features for specific applications, and offer a range of products that can improve power quality to maximise efficiency and guarantee significant energy savings.

Consider us your alter ego

Rapid and comprehensive product customisation, and technical and sales documentation; studies and implementation of customer projects.

All for one, one for all

technical assistance, demo room, on-site training in Italy and remotely.

Continuity with a capital C

we understand the importance of technology in all our daily lives, and we are committed to ensuring its continuity at all times.

SINGLE-PHASE LINE-INTERACTIVE UPS

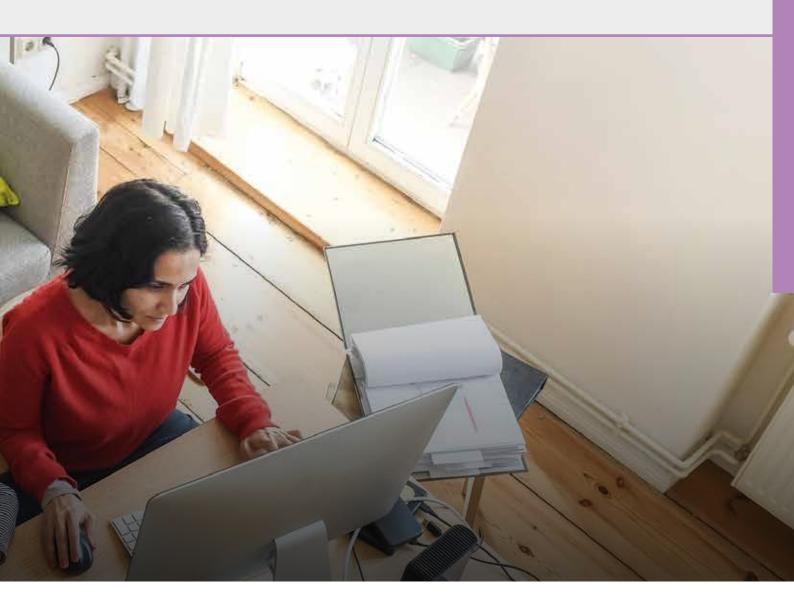

GR 650-2200 VA

GR S 600-2000 VA

GR - GR S

- Line-interactive UPS to protect devices in the home, micro business and SMEs.
- Connected devices are always available because they can be powered up when there is no mains power.
- Automatic restart after prolonged blackouts means that it is always ready to protect your loads.
- The built-in automatic voltage regulator (AVR) stabilises the power when there are mains faults (e.g. spikes, sags, over- and under-voltages etc.), providing high levels of power protection and quality.
- Supplied with PowerMaster, intuitive software that can be downloaded for free. All you need in a box: supplied with input, output power cables and USB cable to protect hardware and data.

- The backlit LCD display makes it easy to read the UPS status, so all parameters can be kept under control.
- Easy battery replacement.
- The plug-in feature ensures that the battery is always charged: the UPS charges the battery even when it is switched off.
- The built-in USB communication port makes it easy to connect to the PC.
- All needed cables included: input, output power and USB cables.

Low cost of ownership due to longer expected battery life

- Wide input allowable tolerance in both voltage and frequency (160-290V - 45-65 Hz): prevents batteries from going into operation when there is a major variation in input power.
- ABDM (Automatic Battery Discharge Management)
 protects batteries from deep discharge by increasing
 the cut-off voltage (battery cut voltage), the voltage at
 which a battery is considered fully discharged.
- Charge control: prevents overcharging of batteries that leads to their degradation by modulating the voltage to the battery to maintain a full charge during its operation.
- Automatic testing every 24 hours allows early detection of problems protecting batteries from failure.

PowerMaster: UPS monitoring and management software

Main features of the monitoring and control software (available free of charge at www.ablerex.eu/download):

- quick and easy installation and configuration via USB;
- orderly, automatic closure of the applications and operating system, even if the user is not there;
- UPS monitoring and power supply event reporting;
- transmission of alarms for the most common power supply problems and notification of system shutdown via email and text message;
- automatic testing of UPS and battery;
- available for Windows, MAC, Linux, etc. (full list available at www.ablerex.eu/download).

GR 650-2200 <u>VA</u>

Plug&play UPS for the protection of home and small business devices

GR S 600-2000 VA

Pure sine wave UPS for the non-stop supply of high end devices or with PFC power supply. UPS equipped with phone and data lines protection

Applications

- PCs
- Wi-Fi routers
- Video game consoles
- TVs
- Satellite receivers
- POS
- · Cash registers
- Surveillance cameras
- Home monitoring devices

Applications

- Workstations
- Gaming PCs
- Small servers
- Networking equipment
- Hi-Fi and home theatre TV
- · Video game consoles
- · Satellite receivers
- Video surveillance
- Pellet stoves

Uptime table

Consulting the summary table below will let you quickly identify a model based on the total VA/W consumption of the devices to be protected.

	GLAMOR - Line-interactive					GLAMOR S - Line-interactive

GR 1000 - 2000 S

SINGLE-PHASE ONLINE UPS

AR PLUS Tower 1000VA - 3000VA

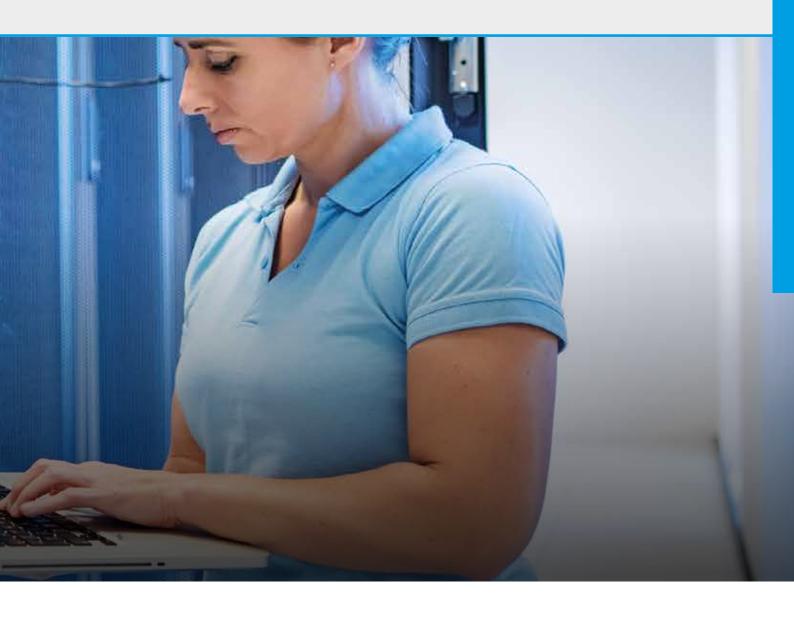

AR PLUS RT • OD PLUS 1000VA - 3000VA

OD H 1000VA - 3000VA

MSIII Tower 6000VA - 10000VA

MSIII RT 1/1 6000VA - 10000VA

MSII RT 3/1 10000VA - 20000VA

AR PLUS Tower - AR PLUS RT

- Online double conversion technology (VFI) from 1000
 VA to 3000 VA with a power factor of 0.9.
- Easy to install.
- Low running costs: the high efficiency VFI and ECO features minimise energy consumption.
- High uptime expandability.
- User-friendly monitoring software can be downloaded free and is compatible with the principle operating systems, for: monitoring functions, diagnostics, controlled shutdown of loads in the event of blackouts.
- High overload handling capacity.
- Constant voltage constant frequency (CVCF) output mode for maximum protection of particularly sensitive loads (e.g. electro-medical equipment).
- Wide input voltage and frequency ranges reduce battery switching, thereby increasing battery life and efficiency.

- Option to set the percentage residual battery charge from 3% to 100% of the available capacity.
- Accurate calculated remaining uptime is shown on the display.
- Two sets of IEC sockets that can be programmed separately.
- Cold start option without mains power.
- Firmware can be upgraded easily to implement new features.
- EPO or On/Off, with remote option.
- RS232 and USB ports, slots for additional communication cards.
- Suitable for CEI 0-16 applications.
- Supplied with input and output power cables.

Key options

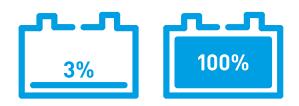

- Cards: RS485, SNMP/web and relay card with dry contacts to send the UPS status to various systems, such as BMS, PLC, SCADA and AS400.
- External manual bypass with additional sockets.
- External battery cabinets.
- Rack mounting rail kit for RT models.

Longer battery life

• Set the battery discharge level (3-100%) with the free software.

Battery reserve management

- The UPS turns off when it reaches the set residual battery charge level.
- The UPS can be switched on again manually even without mains power.

Indicative input power of various devices (you are advised to check actual input power)

• Router 30 W • POS + Cash register 50 W • NAS 60 W • 43" TV 100 W • Inkjet printer / Scanner 180 W • Desktop PC + 21" LCD monitor 250 W • Desktop Gaming PC + 24" LCD monitor 500 W • High-end dual-processor PC + 32" LCD monitor 800 W • Rack/tower server from 300 to 1000 W • Video game console 140 W

Uptime table

Consulting the summary table below will let you quickly identify a model based on the total VA/W consumption of the devices to be protected.

ARES Online								
Model	1000 VA	2000 VA	3000 VA

2100			6					
2700			4					

ARES and ODIN are the ideal UPS for applications that require extended battery operation and for medium-voltage substations in accordance with CEI 0-16.

Their advanced technology maximises battery life and ensures high efficiency.

AR PLUS Tower 1000-3000 VA

For applications that require tower models.

AR PLUS RT 1000-3000 VA

Suitable for all rack types including compact. RT models with lockable sockets are extremely versatile: the rotating display panel means they can be easily transformed into tower versions.

Applications

- High-end PCs
- Workstations and servers
- · Server rooms and micro data centres
- Electromedical equipment

- Network and telecommunications equipment
- Medium-voltage substations
- · PLC control cabinets
- BMS and SCADA systems
- Video surveillance, security and IoT devices

Special applications

Medium-voltage substations and control cabinets (PLC)

Ablerex has a solution whenever you need residual battery capacity. With Ablerex firmware, you can be sure that the UPS always has enough battery capacity to be turned on again and power the load.

Benefits

- Built-in feature that is free and easy to implement.
- Backup of at least 60 minutes, residual charge control in accordance with CEI 0-16.
- Easily customisable residual battery capacity.
- Cold UPS start-up.
- Battery alarm and residual backup time indicator.
- Maximises battery protection and life.

To ensure in any conditions 24/7 opening of electric shutters or doors of shops, bars, restaurants, warehouses and service businesses

If an electric shutter is protected by a UPS, and for some reason the mains circuit breaker trips or there is no power, the open/close mechanisms cannot be operated. The "remote on/off" option means that the Ablerex UPS can be switched on even without mains power so the electric shutter can be opened or closed.

Benefits

- Option that is easy to implement on request.
- Reduces TCO by avoiding the need to overdimension the UPS and batteries to overcome long periods without power (e.g. when closing a business for holidays).
- Maximises battery protection and life.

AR1000 RT Plus

OD PLUS - OD H

- Online double conversion technology (VFI) from 1000
 VA to 3000 VA with a power factor of 0.9.
- Versatile: the display panel can be turned to transform the rack into a tower.
- Easy to install.
- Low running costs: the high efficiency VFI and ECO features minimise energy consumption.
- High uptime expandability.
- User-friendly monitoring software can be downloaded free and is compatible with the principle operating systems, for: monitoring functions, diagnostics, controlled shutdown of loads in the event of blackouts.
- · High overload handling capacity.
- Constant voltage constant frequency (CVCF) output mode for maximum protection of particularly sensitive loads.
- Wide input voltage and frequency ranges reduce battery switching, thereby increasing battery life and

- efficiency.
- Option to set the percentage residual battery charge from 3% to 100% of the available capacity.
- The accurately calculated residual operating time is shown on the display.
- Two sets of IEC sockets that can be programmed separately.
- Cold start option without mains power.
- The firmware can be upgraded easily to implement new features.
- EPO or On/Off, with remote option.
- RS232 and USB ports, slots for optional communication cards.

Specifically for OD H

- Built to guarantee efficiency and performance from -10°C to 55°C.
- Batteries designed for extreme temperatures.

OD PLUS - OD H 1000-3000 VA

When you need to prevent a service outage and ensure safety and continuity in extreme conditions, you need a robust, highly reliable UPS.

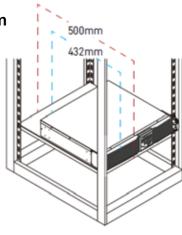

Applications

- · All applications in harsh climate areas
- Industrial applications
- IT and telecoms (transmitting-and-receiving stations)
- Underground transport

- Traffic control
- Wind farms
- Electromedical equipment

Suitable for 600mm cabinets.

OD1000 Plus

MSIII Tower - MSIII RT 1/1

- Maximum power availability: kVA=kW.
- Up to 4 units in parallel, 3 + 1 redundancy possible with parallel kit.
- Low running costs: the high efficiency VFI and ECO features minimise energy consumption.
- User-friendly monitoring software can be downloaded free and is compatible with the principle operating systems, for: monitoring functions, diagnostics, controlled shutdown of loads in the event of faults.
- Cold start option without mains power.
- Wide input voltage and frequency ranges reduce battery switching, thereby increasing battery life and efficiency.

- Flexible battery configuration to suit your uptime requirements.
- Accurate calculated remaining uptime is shown on the display.
- Hot-swappable batteries: the batteries can be replaced while the UPS is running.
- Firmware can be upgraded easily to implement new features.
- EPO or On/Off, with remote option.
- 6-step operation test that can be activated manually.
- RS232 and USB ports, slots for optional communication cards.

Key options

- Cards: RS485, RS232, SNMP/web and relay card with dry contacts to send the UPS status to various systems, such as BMS, PLC, SCADA and AS400.
- Parallel kit.
- External battery cabinets.

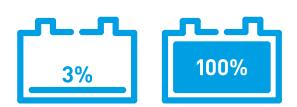

- External manual bypass with additional sockets.
- Rack mounting rail kit for RT models.

Longer battery life

• Set the battery discharge level (3-100%) with the free software.

Battery reserve management

- The UPS turns off when it reaches the set residual battery charge level.
- The UPS can be switched on again manually even without mains power.

The MARS 6000–10000 VA UPS offers the maximum available power (kVA=kW), and can be connected in parallel for power or redundancy and are suitable for applications that require greater uptime.

MSIII Tower 6000-10000 VA

MSIII RT 1/1 6000-10000 VA

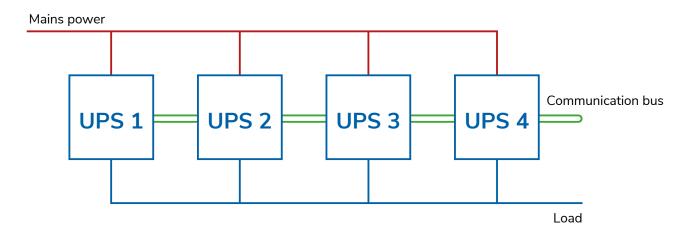

Applications

- Critical IT applications
- · Server rooms and micro data centres
- Network, VOIP and telecommunications equipment
- Video surveillance, security and IoT devices
- Electromedical equipment
- Industrial applications

Parallel operation

Purchasing the parallel kit enables this feature, allowing the load to be shared by more than one UPS.

- Up to 4 units can be connected in parallel for a total power of 40 kVA.
- Load always protected thanks to the option of 3+1 redundancy (up to 30 kVA); in the event of a faulty UPS, it is replaced by the fourth module.
- No single point of failure thanks to the communication bus loop connection.

MSIII 6000 RT

MSII RT 3/1

- Online double conversion technology (VFI) from 10000
 VA to 20000 VA with a power factor of 0.9.
- Versatile because the display panel can be turned to transform the rack into a tower.
- Full power bypass line with single-phase output.
- Up to 4 units in parallel, 3 + 1 redundancy possible with parallel kit.
- Low running costs: the high efficiency VFI and ECO features minimise energy consumption.
- User-friendly monitoring software can be downloaded free and is compatible with the main operating systems, for: monitoring functions, diagnostics, controlled shutdown of loads in the event of faults.
- Cold start.
- Wide input voltage and frequency ranges reduce battery switching, thereby increasing battery life and efficiency.

- Flexible battery configuration to suit your uptime requirements.
- 6-step operation test that can be activated manually.
- Dual input (for Mars II 20 kVA version only).
- RS232 port, slots for optional communication cards and remote EPO.

Key options

- Cards: USB, RS-485 ModBus, SNMP/web and relay card with dry contacts to send the UPS status to various systems, such as BMS, PLC, SCADA and AS400.
- Isolation transformer.
- · Parallel kit.
- · Rail kit for rack mounting.
- External battery cabinets.
- External manual bypass with additional sockets.

MSII RT 3/1 10000 - 20000 VA

Because of its convertible design, the MSII RT 3/1 combines reliability with great installation flexibility

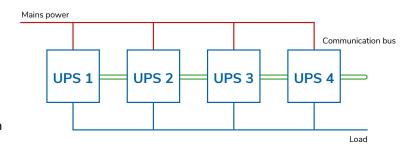

Applications

- Critical IT applications
- · Server rooms and micro data centres
- Network, VOIP and telecommunications equipment
- Video surveillance, security and IoT devices
- Electromedical equipment
- · Industrial applications

Parallel operation

Purchasing the parallel kit enables this feature, allowing the load to be shared by more than one UPS.

- Up to 4 units can be connected in parallel for a total power of 40 kVA.
- Load always protected thanks to the option of 3+1 redundancy (up to 30 kVA); in the event of a faulty UPS, it is replaced by the fourth module.
- No single point of failure thanks to the communication bus loop connection.

Control and management software

UPS monitoring and management

The main features of the PowerMaster software, which is available free of charge at www.ablerex.eu/download, are:

- installation and configuration via USB or RS232 serial port;
- orderly, automatic closure of the applications and operating system, even if the user is not there;
- UPS monitoring and power supply event reporting;
- transmission of alarms for the most common power supply problems and notification of system shutdown by email and text message;
- automatic testing of UPS and battery;
- available for Microsoft, MAC and Linux (full list available at www.ablerex.eu/download).

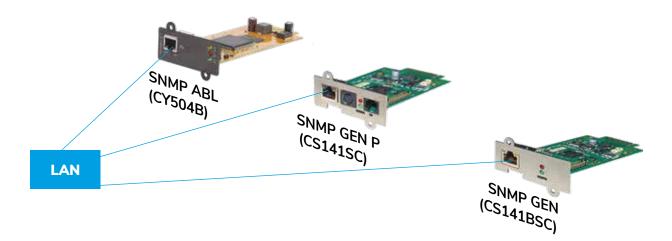

Communication cards and software

Ablerex single-phase online UPS units offer maximum control thanks to optional communication cards:

- the SNMP network card enables you to monitor the status of the UPS from any PC or server connected to the LAN without having to install any specific software, thanks to the Web Server function, or remotely by means of a VPN connection. You can also manage automatic shutdowns of the devices connected to the UPS;
- the relay card with potential-free contacts transmits alarms remotely;
- the RS485 Modbus card effectively communicates the status of the UPS with the most widely used BMS systems.

SNMP control and management

Manage the shutdown of all devices connected to the network with IP by means of remote control software (Generex RCCMD for the SNMP GEN and SNP GEN P cards and Ablerex ClientMate for SNMP ABL) compatible with Microsoft Windows (for desktops and servers), Linux, Apple MAC OS, VMware and others.

Seamless integration with other network programs and SNMP management systems SNMP ABL • SNMP GEN • SNMP GEN P

HTTP/HTTPS interface • MIB • SNMP trap • Email notifications • Log file recording • ModBus via IP

SNMP GEN • SNMP GEN P

Updating of SFTP configuration • BACnet

SNMP GEN P

Notification by SMS • ModBus/ProfiBus on RS232/485

Accessories

Single-phase online UPS

COMMUNICATION CARDS for sending the CPSS status to a control computer

DCE-C: Programmable card with dry contacts client software is included suitable for Ares, Odin and Mars.

SNMP ABL: Network card CY504B for sending data, controlling UPS and receiving alarms via email with SNMP protocol. Suitable for Ares, Odin and Mars. Client software is included.

SNMP ABL E: External network card for sending data (DY522), UPS control and reception of alarms via email with SNMP protocol, suitable for Ares, Odin and Mars. Client software is included.

SNMP GEN P: 3-port Generex card (CS141SC) for controlling UPS and receiving alarms via SMS or/ and email. Includes network interface for sending data with SNMP protocol, port for environmental monitoring sensor connection or RS232 adapter (ModBus or GPRS/GSM modem), and port connecting alarm contacts. Suitable for Ares, Odin and Mars. One RCCMD client software is included.

SNMP GEN: Network card (CS141BSC) for UPS control, sending data, and reception of alarms via email, via SNMP protocol. Suitable for Ares, Odin and Mars. One RCCMD client software license is included.

RS485 card: Card for data exchange via RS-485 via ModBus protocol, suitable for ARES and Odin.

PDU to ensure an energy supply to several devices

ESB-216: External socket box with switch (2 x 16A IEC and 8 x 10A IEC) suitable for Mars 6000 kVA.

ESB-217: External socket box with switch (9 x 10A IEC) suitable for Mars and Odin.

ESB-218: External socket box with switch (4 x 16A IEC) suitable for Mars and Odin.

ESB-219: External socket box with switch (9 x 10A IEC and 5 x 16A IEC) for Mars.

EXTERNAL BYPASS to ensure power continuity during service operations and simplified and safe maintenance

Rack_PDU-216G: External manual bypass with additional sockets (6 x 10A IEC and 2 x 16A IEC) suitable for Ares, Odin RT. Dim. $440 \times 77 \times 87$ mm. Weight 2,7 kg.

Rack-BP_PDU-50: External manual bypass with additional 50A socket ($4 \times 16A$ IEC and $8 \times 10A$ IEC) suitable for Mars. Dim. $440 \times 120 \times 175$ mm. Weight 5 kg.

MTBS-60: 60A maintanance bypass panel, suitable for Mars, max 2×6 kVA o 1×10 kVA. Dim $440 \times 176 \times 124$ mm. Weight 5 kg.

MTBS-120: 120A maintanance bypass panel, suitable for Mars, max 3×6 kVA o 2×10 kVA. Dim $440 \times 176 \times 124$ mm. Weight 5 kg.

MTBS-200: 200A maintanance bypass panel, suitable for Mars, max 4×6 kVA o 3×10 kVA. Dim $440 \times 176 \times 124$ mm. Weight 5 kg.

PARALLEL KIT to share the load among more than one UPS to increase capacity and redundancy

Parallel kit 6k: to connect two 6 kVA 2 UPS units with the included RJ cable, suitable for Mars.

Parallel kit 10k: to connect two 10 kVA 2 UPS units with the included RJ cable, suitable for Mars.

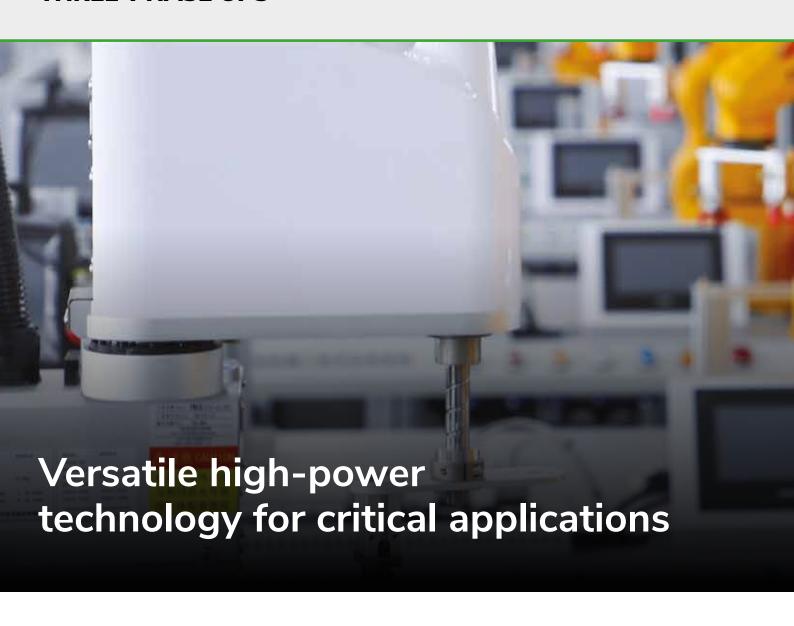

ISOLATION TRANSFORMERS

for protection against electric shocks and ensure power availability to sensitive equipment

TRAFO06: Isolation transformer for 6 kVA, suitable for Mars tower.

TRAFO10: Isolation transformer for 10 kVA, suitable for Mars tower.

THREE-PHASE UPS

KR Plus XL

TS 10-80 kVA

TT 100-500 kVA

TT GT 100-800 kVA

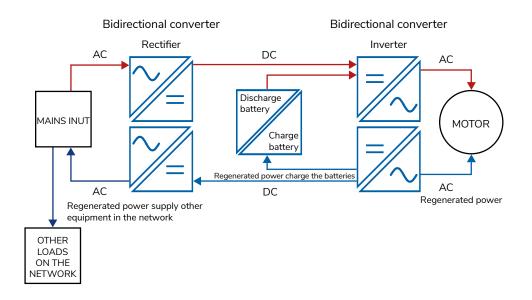

GLM

Continuous power supply in the presence of regenerative loads

Traditional UPS systems often fail when faced with energy returning from the load. The KR UPS, however, ensures a continuous power supply to the protected load even in the presence of regenerative energy.

The problem: many industrial machines, including elevators, are powered by electric motors that frequently start and stop. During deceleration, these motors produce regenerative energy. If unmanaged, this regenerative load can cause over-voltage, damaging critical equipment and reducing the efficiency of industrial operations. Specifically, regenerative energy causes the dc bus to over-voltage in conventional UPS systems, leading them to cease operation.

Complete solution for regenerative energy management (glm)

Patented solution, easily activated via software, this solution provides comprehensive management of regenerative energy.

Robust hardware

The bidirectional design of the KR UPS converters ensures hardware durability.

Eco-friendly

Reuse up to 90% of the energy produced by regenerative loads.

• No oversizing needed

No need to oversize UPS power or battery capacity. The battery voltage remains controlled, and the load stays protected.

KR PLUS - KR PLUS XL

- PF 1 ensures maximum power availability: kVA=KW for KR Plus 10-15-20-30-40 TTS.
- The patented GLM® function enables efficient management and reuse of energy produced by regenerative loads (e.g., elevators, electric motors, CNC machines, etc.).
- Compatible with lithium-ion batteries or other technologies.
- THDi <3% for low impact on the mains supply.
- The internal backfeed contactor integration eliminates the need for an external contactor.
- All models make it possible to maximize the energy available for loads with frequencies other than those of the power grid without loss of performance.
- · Cold start function included.
- Designed to minimise impact on generators and avoid the need for overdimensioning them.
- Up to 95% efficiency in online mode.
- Internal manual bypass and 4-pole switches.
- Vertical internal layout ensures easy maintenance.

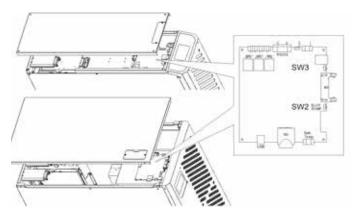

- Fail-safe: the UPS indicates when the phase sequence is connected incorrectly without interrupting the supply from the inverter to the loads, while keeping the batteries charged.
- High overload capacity for up to 1 minute at 150% load.
- Built-in high performance charger (10 kVA with standard charger for up to 10 A)
- Variable battery configuration: 26 to 40 individual 12V blocks settable from the touch display.
- Up to 6 units can be connected in parallel for power or redundancy, settable from the touch display
- Separate or common batteries that can be configured for parallel systems.
- 4.3" colour LCD touch screen display for user-friendly interface (14 selectable languages).
- Wide range of communication options included: two ports as standard, 1xRS232 and 1xUSB, programmable dry contacts plus two additional slots for optional cards.
- Log file for up to 800 events, and UPS information and settings can be easily downloaded to an SD card.

Key options

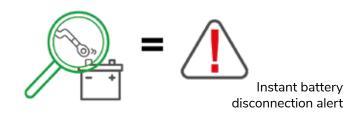

- SNMP, RS485 ModBus and relay card with dry contacts.
- · Parallel kit.
- Removable internal battery compartments for easy battery maintenance.
- External temperature sensor for a battery cabinet.
- Movable touch panel 7" with 3 programmable dry contacts for remotely monitoring up to 64 units.
- Internal backfeed contactor.

UPS event logs and settings can be easily exported to SD-Card

Instant disconnected battery warning

KR PLUS - KR PLUS XL

Lithium ready technology, maximum efficiency and versatility with the smallest footprint in its class.

KR PLUS 10-40 kVA

UPS with PF1 (kVA=kW) provides the highest efficiency with the smallest footprint

The smallest footprint in its class (0.22 m² for 20 kVA with 40x9 Ah internal batteries) and its vertical internal layout ensure a low TCO.

Two interchangeable versions, 3:3 or 3:1-3, can easily be selected on-site (for 10, 15 and 20 kVA) for maximum installation flexibility.

Internal battery up to 40 x 9 Ah (for 10, 15 and 20 kVA).

KR PLUS XL 10-40 kVA

Compact and versatile UPS with easily configurable single- or three-phase output

Flexible and compact design suitable for various configurations.

Long autonomy time thanks to the high number of integrated batteries. Up to 160 internal batteries (120 for 30/40Kva versions)

Thanks to the vertical internal layout of the components, maintenance, board replacement and scheduled battery change activities are simplified.

KR Plus XL range allows for the installation of an internal isolation transformer for input and output.

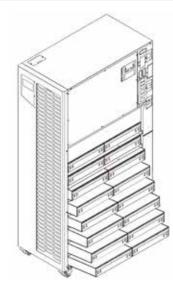

Applications

- Server rooms
- Micro and mini data centres
- Telecommunications equipment
- Electromedical equipment
- Industrial applications
- Ideal for generators

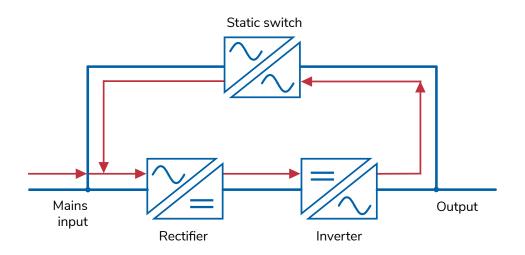

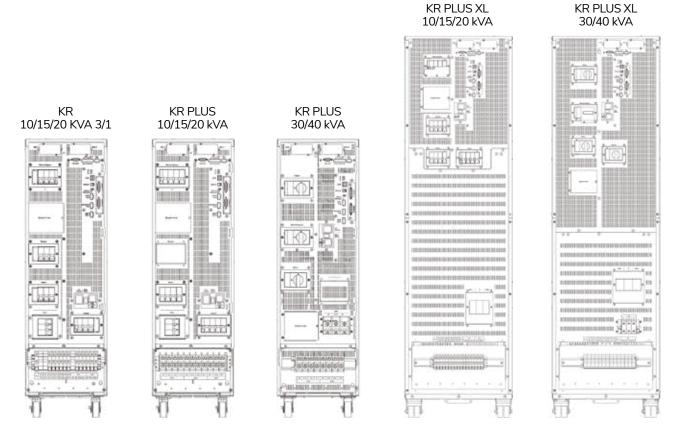

Higt internal battery density

Easy and efficient commissioning and maintenance thanks to the Smart ageing self-test function

- The test function is able to monitor performance over time to identify potential deterioration in the various UPS components.
- More than 90% energy saving thanks to the possibility of performing verification tests without a real load.
- Possible to set up automatic on-site testing at any time: before commissioning or during UPS maintenance.
- Components can be tested by simulating different load conditions without a real load.

^{*}Models KRD: dual inputs (3/3 or 3/1); Models KRS: single input (3/3) ** Subject to conditions *** To be verified according to the battery parameters

- The patented GLM function can reuse energy regenerated by the loads, ensuring maximum efficiency when managing regenerative loads.
- Optimised footprint for maximum installation versatility.
- Designed to minimise impact on generators and avoid the need for overdimensioning them.
- Power factor of 1 (kW = kVA): maximum active power available for your system at all times.
- Fail-safe: the UPS indicates when the phase sequence is connected incorrectly without interrupting the supply from the inverter to the loads, while keeping the batteries charged.
- Up to 6 units can be connected in parallel for power or redundancy.
- The "Energy Saver" function dramatically reduce the facilty power and cooling costs..
- Dual input and internal manual bypass.
- High overload capacity for up to 3 seconds at 300%
- High-performance battery charger for fast, efficient battery charging.

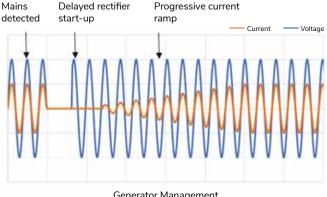

- Variable battery configuration can be set from the
- Compatible with lithium-ion batteries or other technologies.
- Smart battery discharge test without the need for external loads.
- Real-time battery disconnection alarm.
- Cold start (up to 20 kVA standard, up to 80 kVA optional).
- Separate or common batteries that can be configured for parallel systems.
- Wide range of communication options included: two ports as standard (RS232 and USB), programmable dry contacts plus two additional slots for optional cards.
- 4.3" colour LCD touch screen display for user-friendly interface (14 selectable languages).
- UPS information, settings and log files can be downloaded to a removable SD card.

Key options

- SNMP, RS485 ModBus and relay card with dry contacts.
- · Parallel kit.
- Removable internal battery compartments for easy battery maintenance.
- External temperature sensor for a battery cabinet.
- Movable touch panel 7" with 3 programmable dry contacts for remotely monitoring up to 64 units.
- Internal backfeed contactor.

Ideal for generators

TS

TS 10-80 kVA

State-of-the-art technology for a high performance three-phase UPS

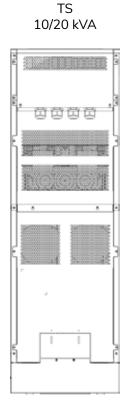

Its power factor of 1 (kW = kVA) and easy maintenance reduce system TCO, making Taurus the best choice for data centres.

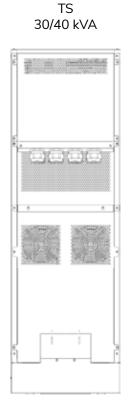

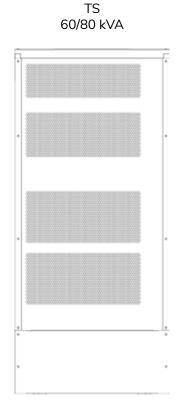

Applications

- Data centres
- Electromedical equipment

- Industrial applications
- Regenerative loads (lifts, cranes, numerically controlled machines, etc.)

TT - TT GT

- Power factor of 1 (kW = kVA) and up to 96% efficiency in VFI mode (up to 99% ECO mode).
- THDi <3% to minimise impact on the mains supply.
- Designed to minimise impact on generators and avoiding the overdimension.
- Power capacitive and inductive loads with no derating.
- Front access for very easy maintenance.
- Ideal for applications that require long back-up uptime. Battery charge current regulation via firmware.
- Neutral disconnector for safe maintenance.
- Dual input and internal manual bypass.

- Up to 6 units can be connected in parallel for power or redundancy.
- Separate or common batteries for parallel systems.
- Battery Care system increases battery life by regulating the charge according to the manufacturer's instructions and minimising the ripple current.
- Wide range of communication options included: two ports as standard (RS232 and USB) and two additional slots for optional cards.
- Wide LCD display 100 kVA to 500 kVA.

Key options

TITAN

- · Programmable dry contacts.
- Common batteries for parallel systems.
- SNMP, RS485, ModBus cards and temperature probe.
- Colour touch screen display for power from 100 to 160 kVA.
- Remote monitoring panel.
- External manual bypass for maintenance
- Parallel kit

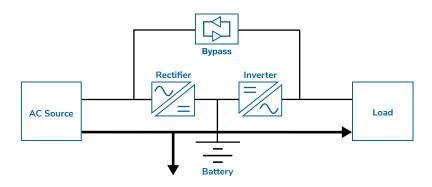

TITAN GT

- Isolation transformer and autotransformer for bypass and/or input line.
- Battery charging voltage compensation based on the temperature.
- Redundant loop parallel communication.
- Load-sync for single or parallel UPS.
- External manual bypass for maintenance
- Parallel kit

Dynamic charging mode function

Thanks to this function, all available power not absorbed by the load can be used to quickly charge batteries, including those sized for long autonomies.

The function, which can be activated by the firmware, allows the charging current of the batteries to be adjusted.

TT 100-500 kVA

Titan offers maximum protection and efficiency in a compact design, while ensuring absolute power continuity in all critical applications

TT GT 100-800 kVA

With its built-in transformer with galvanic isolation, Titan GT offers maximum protection and efficiency with the lowest running cost

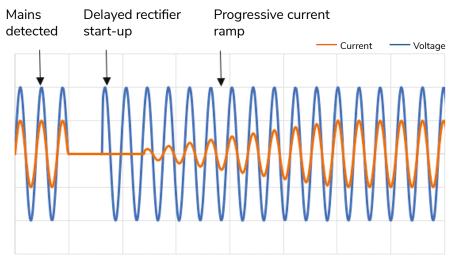

Applications

- Data centres
- Electromedical equipment

Control and management software

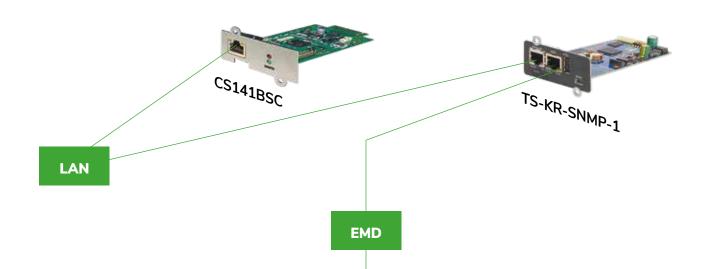

Communication cards and software

Ablerex three-phase online UPS units offer maximum control thanks to optional communication cards:

- the SNMP network card enables you to monitor the status of the UPS from any PC or server connected to the LAN without having to install any specific software, thanks to the Web Server function, or remotely by means of a VPN connection. You can also manage automatic shutdowns of the devices connected to the UPS;
- the relay card with potential-free contacts transmits alarms remotely;
- the RS485 Modbus card effectively communicates the status of the UPS with the most widely used BMS systems.

SNMP control and management

Manage the shutdown of all devices connected to the network with IP by means of remote control software (Generex RCCMD for SNMP GEN card and Ablerex ClientMate for the TS-KR-SNMP-1 card), compatible with Microsoft Windows (for desktops and servers), Linux, Apple MAC OS and VMware.

Seamless integration with other network programmes and SNMP management systems

TS-KR-SNMP-1 • SNMP GEN

- HTTP interface Network message SNMP trap
- Email notifications Log file recording
- Notification by text message Modbus over IP

CS141BSC • CS141MINI

- BACnet
- SFTP configuration update

Power communication function extensions (COM2)

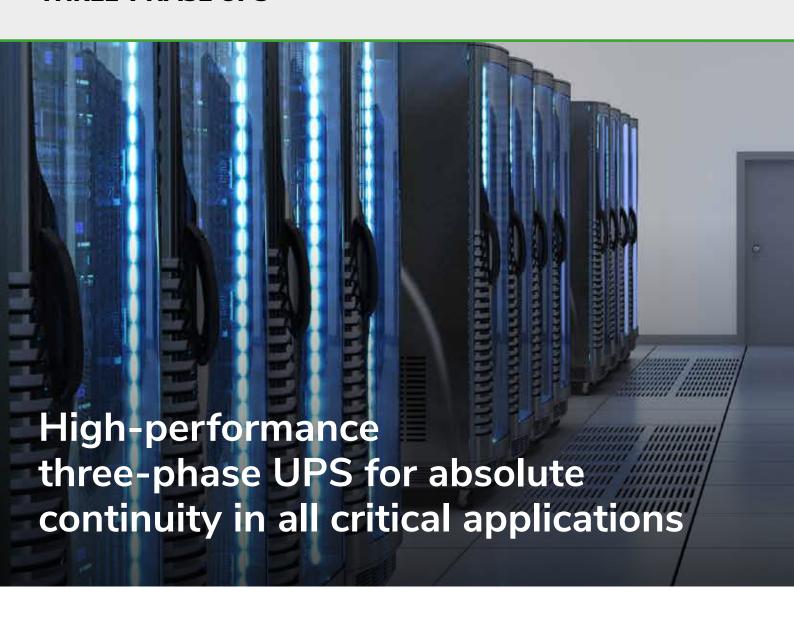

- SensorManager temperature and humidity monitoring
- Selectable alarm thresholds
- Data transmission from the SM_T_COM temperature sensor
- Data transmission from the SM_T_H_COM humidity sensor

Accessories

Three-pha	ase monolithic UPS
COMMUNICATI	ON CARDS for sending the UPS status to a control computer
	TS-KR-SNMP-1: Communication card with SMNP protocol with client software included.
	SNMP GEN: Communication card (CS141BSC) with SMNP protocol with client software included.
	TS-KR-EMD: Environmental monitoring sensor for SNMP card (temperature and humidity).
	TS-KR-485: Card for data exchange via RS-485 with ModBus protocol
	TS-KR-DEC: 6 in 6 out programmable relay card with dry contact singnal.
ACCESSORIES	FOR MONITORING INTERNAL BATTERY TRAYS to increase uptimes
	TRAY 32-40: Tray for battery blocks (each tray can contain up to 40 blocks), for TAURUS from 10 to 40 kVA.
COLD START K	IT to allow the UPS to start from batteries without mains power
	CS30kVA: Contactor and cables, kit suitable for 30 kVA Taurus.
	CS40kVA: Contactor and cables, kit suitable for 40 kVA Taurus.
	CS60kVA: Contactor and cables, kit suitable for 60 kVA Taurus.
	CS80kVA: Contactor and cables, kit suitable for 80 kVA Taurus.
EXTERNAL BY-	
it enables the U	PS system to be electrically isolated – taken it out of the critical power circuit – for safe UPS maintenance or unit replacement.
	BYPASS 10 3/1: By-pass box x 10 kVA 3/1.
	BYPASS 20 3/1: By-pass box x 20 kVA 3/1.
	BYPASS 20 3/3: By-pass box x 20 kVA 3/3.
	BYPASS 40 3/3: By-pass box x 40 kVA 3/3.
	BYPASS 60 3/3: By-pass box x 60 kVA 3/3.
	BYPASS 80 3/3: By-pass box x 80 kVA 3/3.
	BYPASS 250 3/3: By-pass box x 250 kVA 3/3.
	BYPASS 400 3/3: By-pass box x 400 kVA 3/3.
BACKFEED PRO	OTECTION to ensure protection against a possible power backfeed from the mains.
	BF10kVA: Internal backfeed contactor for 10 kVA Taurus.
	BF20kVA: Internal backfeed contactor for 20 kVA Taurus.
	BF30kVA: Internal backfeed contactor for 30 kVA Taurus.
	BF40kVA: Internal backfeed contactor for 40 kVA Taurus.
	BF60kVA: Internal backfeed contactor for 60 kVA Taurus.
	BF80kVA: Internal backfeed contactor for 80 kVA Taurus.
ISOLATION TRA	
	TRAFO10: Transformer for 10 kVA Taurus and Kronos.
	TRAFO20: Transformer for 20 kVA Taurus and Kronos.
	TRAFO30: Transformer for 30 kVA Taurus and Kronos.
	TRAFO40: Transformer for Taurus and Kronos 40 kVA.
	TRAFO60: Transformer for 60 kVA Taurus.
	TRAFO80: Transformer for Taurus 80 kVA.
PARALLEL KIT	AND CABLES to share the load among more than one UPS to increase capacity and redundancy
	PARKIT TS: Parallel kit composed of card and 1.5 m cable for Taurus.
	PARKIT KR: Parallel kit composed of card and 1.5 m cable for Kronos.
	PARCAB30: 3 m parallel cable for Kronos and Taurus.
	PARCAB80: 8 m parallel cable for Kronos and Taurus.
DUST FILTER	
	FILTERTS10-40: Dust filter for 10 to 40 kVA Taurus.

THREE-PHASE UPS

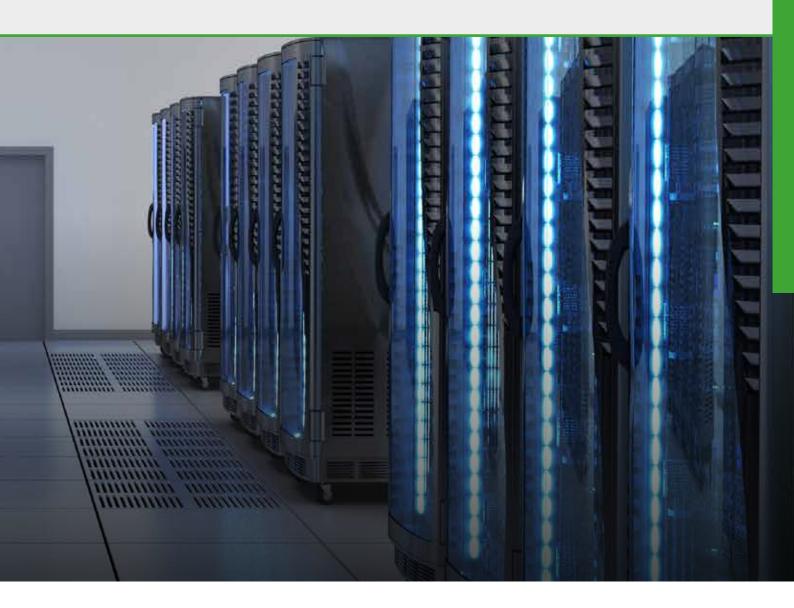

MD

- The high-density design with full hot-swap technology for both power and bypass modules ensures continuity and protects your load at all times.
- Power factor of 1 (kW = kVA): maximum active power available at all times.
- Very high efficiency (up to 99.3% in ECO Smart mode) for maximum energy saving: bypass and inverter work together to provide combined energy to the load and ensure zero transfer time in the event of a blackout.
- Up to 4 units can be connected in parallel (up to 3.6 MW) for power or redundancy.
- Long component life for a lower TCO (Total Cost of Ownership): the Energy Saver function automatically makes the power modules work in rotation to ensure greater efficiency and duration.
- Designed to minimise impact on generators and avoid overdimensioning them.
- Optimised footprint for maximum installation versatility to make installation possible in any type of environment.
- Easy installation thanks to the central bypass that ensures better load balance and lower risk of system overload.

- Variable battery string configuration can be set from the LCD for maximum installation flexibility.
- Minimum battery voltage can be set according to the discharge current, so the batteries can always be used in the best way to maximise their expected or lifespan life.
- High quality long-life capacitors (up to 10 years under favourable operating conditions).
- Cold start function included.
- Compatible with lithium-ion batteries or other technologies.
- Dual input for main power supply and bypass.
- Internal manual bypass.
- User-friendly LCD touch display with multi-language graphical user interface to have everything under control at all times.
- Event log can be downloaded directly from the LCD via USB port.
- Communication slots for optional card.
- RS485-ModBus, relay card with dry contact and USB port built-in.

Key options

- Input, output and bypass breaker.
- Communication cards: Web SNMP.
- Isolation transformer.

· Additional battery charger for long uptimes.

Contact our offices for a complete list of accessories

60 kVA Combo solution

- Up to 4 internal strings of 40 x 9 Ah batteries.
- Fuses to protect each string.

MD 15-900 kVA

High-performance three-phase modular UPS for absolute continuity in all critical applications Fully scalable and high efficiency (99.6% in ECO mode), the Thor series based on 15, 25 and 75 kVA/kW modules guarantees energy saving and minimum TCO (Total Cost of Ownership).

Applications

- Data centres: from micro to large
- Network Operations Centres (NOC)
- Security operations centres
- Telecommunications systems

- · Broadcast and video streaming infrastructure
- · Industrial automation control systems
- Remote teaching infrastructure
- Healthcare facilities

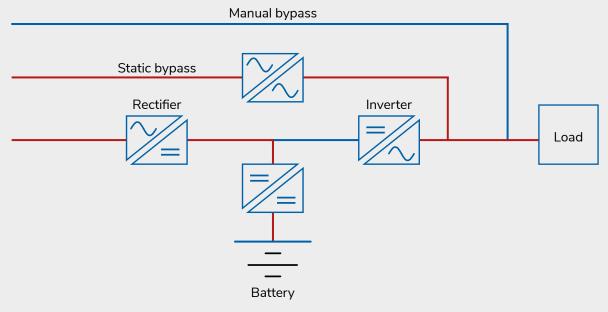

Energy Saver: higher efficiency and lower TCO (Total Cost of Ownership)

The Energy Saver function ensures the modules last a long time by automatically making them work in rotation to balance component wear and increase their life.

ECO Smart mode: higher energy savings and maximum availability of connected systems

In ECO Smart Mode (iECO), the bypass and inverter work together to provide combined energy.

This can achieve greater efficiency (up to 99.3) and ensure a transfer time of 0.

SINGLE AND THREE-PHASE CPSS

CPSS 1/1 4000-10000 VA

CPSS 3/3 10-40 kVA

CPSS

- Fully EN 50171 compliant with third party test certificate, the ZEN CPSS is a real Central Power Supply System that meets all legal requirements for the protection of emergency and safety systems.
- Easy to install: smallest footprint among EN 50171 compliant products.
- Wide variety of audible and visual alarms including: battery polarity reversal, CPSS and battery charger short circuit, power failure, low battery, bypass transfer, CPSS fault.
- Cold start from the battery without mains power.
- Maximum efficiency (up to 98%) and flexibility thanks to the 4 operating modes.
- The single-phase version includes mixed, online and SE modes with separate outputs, while the three-phase version requires optional accessories.
- Dual input and internal manual bypass for simple, completely safe maintenance.
- High overload capacity: delivers up to 120% of the rated power indefinitely.
- Easy and fast connection guaranteed by the terminals, which have been enlarged in the single-phase version.
- Option of internal battery with housing for 40 9Ah batteries for three-phase 10 and 20 kVA models (with optional tray kit only), giving a compact solution for small-load applications.

- Protection against load-side short circuits and battery polarity reversal, without the risk blowing fuses during commissioning, even in the event of reversal.
- Shorter charging time and longer battery life thanks to high charge current with temperature compensation.
- Accurate calculated remaining uptime is shown on the display.
- Hot-swappable batteries: the batteries can be replaced while the CPSS is running.
- Greater flexibility offered by the internal charger that is easy to set from the display.
- Battery life of 10 years.
- Heat and fire resistant IP20 casing that is EN 60598-1 compliant.
- Easily upgradeable firmware.
- RS232, USB and EPO ports built-in, and slots for optional communication cards. Remote on/off available in the single-phase version.

Fully EN 50171 compliant with third party test certificate

Key options

- Cards: SNMP, RS485 ModBus and relay card with dry contacts
- EN 50272-2 compliant battery cabinet

CPSS single-phase

· Additional battery charger for long runtimes

CPSS three-phase

- · Parallel kit
- Mixed mode kit

EN 50171 compliant CPSS designed to ensure the highest degree of protection in the critical environments of all emergency system installations.

For everyone's peace of mind: designers, retailers, installers and end users.

CPSS single-phase 4000-10000 VA

CPSS three-phase 10-40 kVA

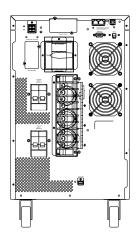

Applications

- Emergency lighting
- Fire alarm systems
- Smoke extraction systems
- Gas and smoke detection systems

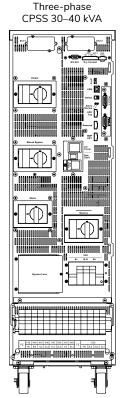

- · Security alarm systems
- PAV Voice Systems
- Lone Worker Systems

Single-phase CPSS 4–6 VA CPSS 8–10 VA

Three-phase

CPSS 10-20 kVA

CPSS

Accessories

CPSS ZEN single-phase

COMMUNICATION CARDS for sending the CPSS status to a control computer

DCE-C: Programmable card with dry contacts with dry contacts with client software included.

SNMP ABL: Network card CY504B for sending data, controlling CPSS and receiving alarms via email with SNMP protocol. Client software is included.

SNMP GEN P: 3-port Generex card (CS141SC) for controlling CPSS, and receiving alarms via SMS or/and email. Includes network interface for sending data with SNMP protocol, port for environmental monitoring sensor connection or RS232 adapter (ModBus or GPRS/GSM modem), and port connecting alarm contacts. One RCCMD client software is included.

SNMP GEN: Network card (CS141BSC) for CPSS control, sending data, and reception of alarms via email, via SNMP protocol. One RCCMD client software license is included.

RS485 CARD: Internal for data exchange via the R485 protocol.

EXTERNAL BYPASS to ensure power continuity to the load during maintenance

MTBS-60: 60A bypass panel.

MTBS-120: 120A bypass panel.

MTBS-200: 200A bypass panel.

Rack-BP PDU-50:

External manual bypass with additional 50A sockets (4 x 16A IEC and 8 x 10A IEC) or powered by CPSS.

ISOLATION TRANSFORMERS for protection against electric shocks and ensure power availability to sensitive equipment

TRAFO06: Transformer for 6 kVA.

TRAFO10: Transformer for 10 kVA.

CPSS ZEN three-phase

COMMUNICATION CARDS for sending the CPSS status to a control computer

SNMP GEN: Generex network card (CS141BSC) for sending data with SNMP protocol for UPS control and reception of alarms via email. One RCCMD client software license included.

TS-KR-SNMP-1: Network card for sending data with SMNP protocol for controlling the UPS and reception of alarms via sms or/and email and, with port to measure temperature and humidity. Client software included.

TS-KR-EMD: Environmental monitoring sensor for SNMP card with temperature and humidity monitoring.

TS-KR-485: Card for data exchange via the RS-485 protocol.

TS-KR-DEC: 6 in 6 out programmable relay card with dry contacts for sending data to PLC, SCADA or AS400.

ISOLATION TRANSFORMERS for protection against electric shocks and ensure power availability to sensitive equipment

TRAFO10: Transformer for 10 kVA.

TRAFO20: Transformer for 20 kVA.

TRAFO30: Transformer for 30 kVA.

TRAFO40: Transformer for 40 kVA.

PARALLEL KIT to share the load among more than one CPSS to increase capacity and redundancy

PARRIT KR: Parallel kit composed of card and 1.5 m cable.

PARCAB30: 3 m parallel connection cable.

PARCAB80: 8 m parallel connection cable.

MIXED MODE KIT: to have SA and SE with separate outputs MIXED.

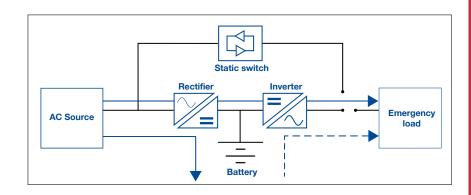

OP4ZEN: wall-mounted kit with contactor for mixed mode 40 kW (150A).

Operating mode

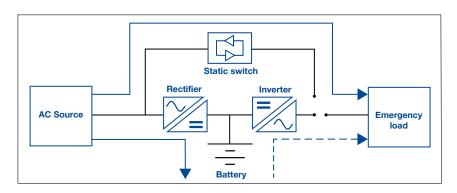

Online mode (VFI)

The load is always powered (SA) by the inverter.

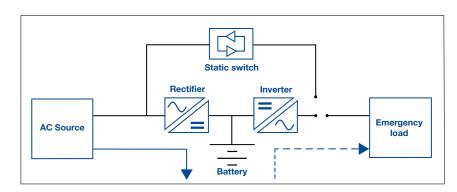

ECO mode

The load is powered by the bypass during normal operation and by the inverter when there is no mains or it is out of tolerance.

Emergency mode (SE)

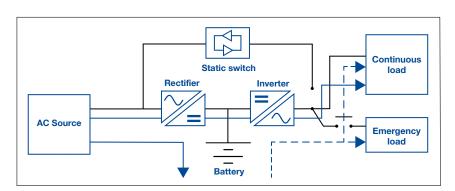

The load is only powered by the inverter when there is no mains or it is out of tolerance.

Mixed mode

One load is always powered by the inverter, while the other load is only powered by the inverter when there is no mains or it is out of tolerance (SA and SE with separate outputs).

The three-phase version required the optional Mixed mode kit.

POWER QUALITY DEVICE

ESP Active filters **STS**

ATSActive transfer switches

BMSBattery monitoring system

ESP

- Enersine active wall-mount filters offer the most economical and effective solution, while the scalability of the modular ones protects your investment over time.
- The power modules of the modular version are easy to install and are hot swappable: they can be replaced while the filter is operating.
- Versatile thanks to the modularity, high nominal current and possibility of parallel connection up to 400 A for the wall version, and up to 2400 A for the modular version.
- Enersine is available in two versions, 4 or 6 modules for 60 A, 80 A or 100 A, which can also be used in a mixed configuration within the same system.
- Maximum performance with 3-level DSP technology.
- Their compact, high-power-density design optimises space.
- Multi-purpose: one model covers all three-phase systems (3-wire or 4-wire).

- Correction of all harmonics up to the 51st (up to the 25th for 30 A) with a response time of less than 1 ms.
- No overload effect.
- Selective mode to select the harmonics to be corrected.
- Phase balancing of three-phase loads.
- Open loop or closed loop installation.
- A single control module manages up to 8 power modules.
- All parameters are under control via the 7" colour (2.7" LCD for 30 A model) touch screen display that shows: voltage and current waveforms, frequency spectrum, parameters and events.
- Events and parameters can be downloaded to a removable SD card.
- Advanced communication: dry contacts (3 in and 1 out), USB, RS485 Modbus, RJ45 Ethernet, programmable email alarm.

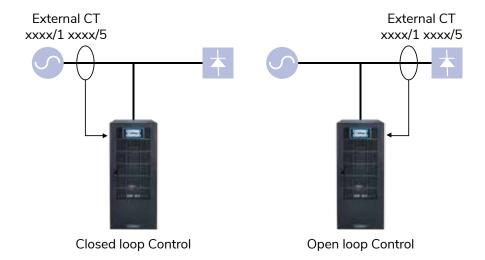

User-friendly user interface

The 7" colour touch screen display can be used to set all parameters, read the event log file and download data to a removable SD card (for 60 A, 80 A, 100 A wall-mounting model and all modular models).

It can also show the voltage and current waveforms, before and after enabling the Enersine, along with a frequency spectrum bar graph.

Open/closed loop control

Ablerex Enersine active filters can correct any type of harmonic contamination to protect the system from faults (e.g. burnt-out transformers, damaged capacitors, etc.), while also improving the power factor.

ESP wall-mount 30-100 A

ESP modular 400-600 A

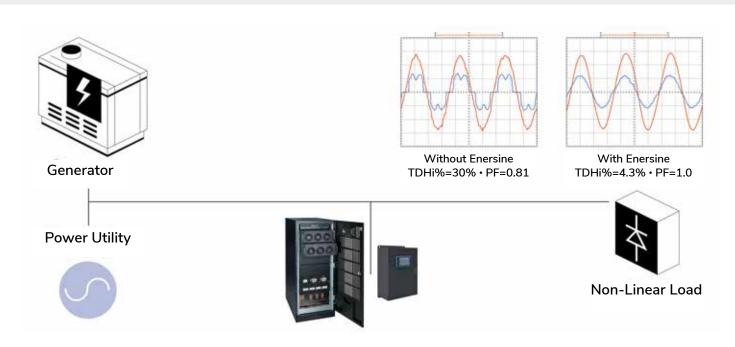

Applications

- Broadcasting
- Shopping centres
- Energy suppliers

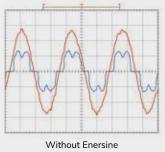

- Transport infrastructure and control rooms
- Oil&Gas
- Healthcare sector

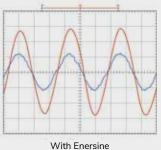

ESP

Harmonic and PF correction that can be verified on the display

Ablerex Enersine not only actively corrects harmonic currents up to the 51st order, but also improves the inductive or capacitive power factor with a response time of less than 1 ms. The benefits can be seen easily on the display.

TDHi%=4.3% • PF=1.0

POWER QUALITY DEVICE

STS

- Provides redundant power to single-input equipment by managing two separate, independent power sources.
- Maximum automatic transfer speed between two
- sources: ≤5 ms for the 63 A versions, ≤4 ms for the100 A to 1250 A versions.
- Maximum protection: it automatically inhibits the transfer in the event of a downstream short circuit, preventing damage to both sources.
- Total source independence and internal redundancy on all components including bypass, power supplies, cooling systems etc. ensures maximum continuity to the connected loads.

- Direct front access to all components and separate dual manual bypass guarantee easy and safe maintenance.
- Continuous input voltage and frequency monitoring to allow safe switching without source cross-overs.
- Real-time SCR status detection and backfeed protection for maximum upstream system safety.
- Circuit breakers for improved protection in all conditions.
- RS232, RS485 ModBus ports, dry contacts and slots for optional communication card.

Key options

- · Additional dry contacts card.
- Operation without neutral.
- · Isolation transformer.

- Top cable entry.
- 4-pole configuration with switched neutral.

STS Central static transfer systems for maximum availability in critical applications

High performance: maximum transfer speed, high power management and high overload capacity.

Applications

- Data centres
- · Telecommunications and broadcasting equipment
- Industrial applications

POWER QUALITY DEVICE

ATS

- Redundant power to single-input equipment by managing two separate, independent power sources.
- High automatic transfer speed between two sources (8 - 12 ms).
- The LCD display makes it easy to control.
- Takes up minimal space: 1U for 16 A and 2U for 32 A.
- EPO for greater safety.

- The ITS version with manual bypass and hotswappable ATS guarantees 100% power continuity.
- Output sockets:
 - 16 A version: 8 x IEC C13 and 1 x IEC C19
 - 32 A version: $12 \times IEC C13$ and $2 \times IEC C19$ + terminals.
- USB and RS232 ports, relay card with dry contacts and slots for optional communication cards.

Key options

• SNMP/web and RS485 card for remote management

ATS Automatic transfer systems

These guarantee redundant power to rack equipments with a single power supply.

Applications

- Server rooms
- Data centres

- Networking equipment
- Video surveillance and security equipment

ERMES 16A

ERMES 32A

ERMES 32A BP

BMS

- Total flexibility with 2.4 GHz wireless communication technology that requires no preventative design and allows rack and cabinet configurations to be changed at any time.
- Everything easily under control: the most important parameters of each battery block are measured, including impedance, voltage, current and temperature.
- Very simple and fast installation ensures good savings.
- Each block has an equalization function to prevent spikes and maximise battery life and performance.
- Each ENERBATT system can monitor and protect up to 750 blocks.
- Automatically disables the measurement instrument if the end-of-discharge voltage is reached in order to safeguard the batteries.
- The measurement instruments are re-enabled automatically when the charging current is restored.

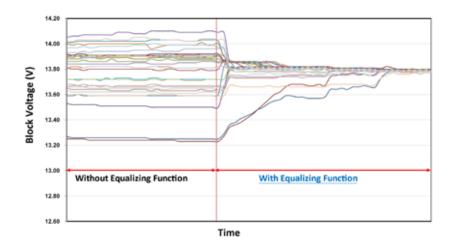

- Update frequency of 1 Hz ensures accurate measurements.
- Simultaneous management of batteries of different capacities and types (e.g. VRLA, AGM, NiCd, OPTS, OPZV, etc.) and mixed voltage configurations (e.g. 48 V and 240 V battery systems).
- Colour touch screen display to clearly see configurations and parameters, including diagrams and voltage trend plots.
- Programmable alarm level.
- Alarm alerts via email and dry contact.
- Removable SD card for event storage.
- RS485 port for communication between the receiver and control panel for monitoring large plants.
- Ethernet port and additional RS485 port for remote monitoring.

Key options

- Temperature sensor for each block.
- Sensor kit for use with Ni-Cd batteries.
- Additional antenna for each battery string meter (BMS-SMK) to extend the wireless range.
- Dedicated software for remote monitoring and data storage.

Battery voltage equalizer

Continually equalizes the end-of-charge voltage of the batteries to the optimal level in order to prevent overcharging and ensure the best performance and durability. With the equalization function active, the voltage of each battery block is continually kept at the ideal value.

BMS Wireless battery analysis, monitoring and protection system

The voltage equalization function between the individual blocks guarantee the lowest installation and operating cost, maximum performance and battery system life.

Applications

- Server rooms
- Data centres
- Telecommunications equipment
- Industrial automation systems
- TV broadcast equipment

- Video surveillance equipment
- Electrical panels and cabinets
- Electromedical equipment
- Energy storage systems

BMS

Wireless Battery Monitoring System

Easy

The wireless design simplifies installation and makes maintenance cost effective.

• Flexible

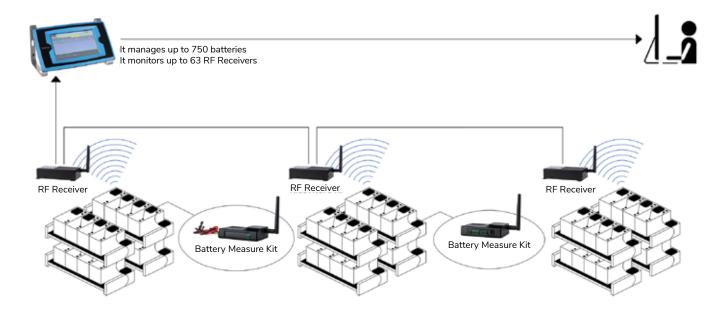

No pre-design is needed, it can be adapted easily to any further configuration changes.

Intelligent

Real-time monitoring via graphic LCD touch screen or web, programmable email alarms. Guarantees savings in investment and operating expenses (CAPEX and OPEX).

Powerful

One collector for up to 750 batteries of any type and 63 RF receivers. Battery protection is always active thanks to the equalisation functions.
